

QUOTATION

ROTATION VAPORISER MODULE **WEBER WIR 3000**

Vaporiser modules for connection to an existing refrigerating unit or external WIV condenser set module with 3000 kg daily output

Equipment features

- Rotation vaporiser module inclusive machine housing
- Ejection of ice at the front side of the machine housing
- Interface on the electronic controller for connecting a condenser set controller (external)
- Servicing interval indicator

Ice production (kg / 24 h):	approx. 3000
Power supply (V / Hz / A):	400 / 50 / 16
Power consumption (kW):	approx. 1.4
Weight (kg):	approx. 210

Refrigerating capacity
requirement (W)

(at t_o : $-20\text{ }^{\circ}\text{C}$ and t_c : $+40\text{ }^{\circ}\text{C}$): approx. 17000

Water connections (inlet and outlet): R $\frac{3}{4}$ "

Housing dimensions (mm): 1105 x 960 x 1280 (width x depth x height)

For use with R 404 A refrigerant
