

## QUOTATION

### AUTOMATIC BELT SKINING MACHINE MAJA ESB 4434

The automatic MAJA derinding machines ESB 4434 are made for the safe derinding of flat meat cuts through an infeed conveyor belt.

The advantages :

One machine for all cuts: Automatic derinding with infeed conveyor belt and also manual derinding for high flexibility.

High operator safety for derinding of flat cuts with the infeed conveyor belt.

Fast changeover from automatic derinding to manual operation.

Cutting width -	434 mm
Width -	860 mm
Depth with conveyor belts -	1750 mm
Height -	1242 mm

Electrical connection - 0,75 kW, 400V/50Hz/3ACV

Weight - 235 kg
