

## QUOTATION

### BRINE MIXER WITH COOLING SISTEM SCHRODER LMK 750-2

The LMK 750-2 mixer is used for the precise mixing of solid and liquid components. The operations are automatically controlled up to the completely mixed brine.

Dual brine preparation system is designed for preparation with lots of dry ingredients. The system allows for quick and effective achievement of homogenous brine used in food processing.

Two tanks ( preparing and storing tanks ) two highly efficient pumps, a analog control system and cooling system - all of this enables to carry out further injection and massaging

processes effectively.

This directly affects the quality improvement of the final product.

Brine mixing installation with 2 mixing tanks volume x 750 l

Electrical connection: 380 – 440 V, 3P/NPE, 50 Hz 4,0 kW

Water connection: Hose connection Ø 40 mm

Machine dimensions:
